TO THE OWNER/OPERATOR:

Read this manual completely before using your gate. Operate and maintain your gate safely as outlined in this manual. Be sure you read and understand all operating, safety, maintenance and service information. Should you need repair or service information, contact Tommy Gate or an authorized distributor for assistance.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

**DANGER** indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

**WARNING** indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

**CAUTION** indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

**CAUTION** indicates a potentially hazardous situation which, if not avoided, may result in property damage.

Safety is a primary concern in the design and manufacture of our products. Unfortunately, our efforts to provide safe equipment can be wiped out by a single careless act of an operator.

Accident prevention and safety are dependent upon the awareness, concern, prudence and proper training of the personnel who operate, transport, maintain and store this equipment. It is your responsibility to use good judgment in the operation of this equipment.

It has been said that "the best safety device is an informed, careful operator." We ask you to be that kind of operator.
DECAL LOCATIONS AND DESCRIPTIONS

Locate and read all decals prior to operating gate

REPLACE IF MISSING OR NOT READABLE

⚠️ WARNING
Read maintenance and service information.

Frequently check liftgate components and safety devices for wear or damage and repair as necessary.

Do not modify or disable safety features.

Do not try to lift or lower more than the rated capacity of the lift.

Never allow children or any untrained person to operate the lift.

Do not show children or others how to operate the lift.

When the lift is not in use, is unattended, or the vehicle is moving, the platform should be closed and latched with control secured.

Decal No. 1
Located on the passenger side of upright.

⚠️ WARNING
Platform opening and closing forces/weights will vary if your vehicle is on an incline.

Stand clear of all moving parts when operating the liftgate.

Do not add any extension to original platform.

Decal No. 2
Located on the outside right-hand corner of the platform.

⚠️ WARNING
Keep away from moving parts

Decal No. 3
Located on the side of uprights.

⚠️ WARNING
Tommy Gate does not recommend that you ride on the platform while operating the liftgate. However, if you must ride in order to safely move your cargo, follow the safety precautions listed in the owner's manual.

Center and secure load on platform side to side and front to back.

Stand in a safe position away from moving parts while the liftgate is in use.

Decal No. 4
Located on the passenger side platform lid end.

⚠️ CAUTION ⚠️

Failure to lubricate properly could cause premature failure of lift chains.
Lubricate the lift chains and pivot points to prevent the bearing areas from becoming dry.
Use clean, high-quality, nondetergent, petroleum-based oil - not grease.
Nondetergent oil weight to use:
Below freezing - 10W
Above freezing - 20W

Decal No. 7

⚠️ WARNING ⚠️

Read operator's manual before operating equipment.
Do not modify lift or its safety features.
Use only Tommy Gate service parts installed by an authorized distributor.
If additional assistance is needed, call Tommy Gate at 712-847-8000.
Do not exceed the rated lift capacity-

⚠️ WARNING ⚠️

Liftgate is not to be used as a scale.
Liftgate may lift more than its rated capacity.
Be aware of how much is being lifted and never exceed the rated capacity of the liftgate.
Be aware of how much is being hauled and never exceed the rated capacity of the vehicle.

Decal No. 13
Located above the control.
If the liftgate is going to be painted, you need to mask the decals before painting. Remove the mask after painting so the decals can be read clearly.

To replace decal, clear area of grease and dirt with non-flammable solvent and soap and water. Allow to dry. To apply decal, peel off 1/2 of back. Hold decal squarely and apply to cleaned surface. Peel off remaining back and smooth in place. Gently rub decal with a damp rag or sponge to smooth out bubbles. (The decal has a pressure-sensitive adhesive on the back.)

If the liftgate is going to be painted, you need to mask the decals before painting. Remove the mask after painting so the decals can be read clearly.

**DECAL REPLACEMENT**

**NOTE:** When ordering Decals, please have Decal Numbers available.

RAILGATE TERMS AND METHOD OF OPERATION

Your Tommy Gate is connected to your vehicle battery. The vehicle battery powers a motor, coupled to a hydraulic pump. This motor and pump combination is called a power unit. Flow from the pump extends a cylinder to provide tension to the lift chains that lift the gate platform. A check valve blocks return flow from the cylinder to the pump and a pressure relief valve prevents the gate from being overloaded. The gate platform is lowered by gravity after the "lower" solenoid valve is activated and opened at the pump.

**Warning:** Liftgate is not to be used as a scale. Liftgate may lift more than its rated capacity. Be aware of how much is being lifted and never exceed the rated capacity of the liftgate. Be aware of how much is being hauled and never exceed the rated capacity of the vehicle.

Two safety switches are mounted above the safety trip bar. These two switches interrupt power from the "raise" solenoid and direct the power to the "lower" solenoid valve if an obstruction raises the safety trip bar.

A "Low Voltage" condition exists when 7 Volts or less is present at the power unit. A low voltage condition should be corrected as soon as possible. In a "Low Voltage" situation, whether the gate actually raises or lowers depends on how low the voltage is.

**Caution:** Continuing to operate the the liftgate in the "Low Voltage" condition may result in failure of electrical components in the power unit.

The low voltage condition may be caused by a weak battery, loose or corroded connections, improper ground, or bad electrical cables. This condition may be corrected by just starting the vehicle or replacing the battery.

The terms used to describe parts of the railgate in this manual can be found in (Figure 1).

![Figure 1: Railgate terms.](image)

**Caution:**

Never leave the truck with the platform on the ground, partially raised, or open.
Never show children or unauthorized personnel how to operate the gate.

To prevent children or unauthorized personnel from operating the lift, be sure the gate is in the stored position and both the driver's side and passenger's side latches are secured. Make sure the passenger's side latch padlock is installed and the control is deactivated before leaving the truck unattended.
RAILGATE OPERATOR’S INSTRUCTIONS
SELF-CLOSE PLATFORM

Step 1. Never show children or unauthorized personnel how to operate the railgate.

Step 2. Clear away obstructions that could damage the platform while the load is being raised or lowered.

Step 3. Be sure to stand to the side of the lift, not behind it when opening the platform.

Step 4. To turn the control power on, press the "POWER ON" hidden switch once, marked with white rings or circles (located below the Tommy Gate logo). You should see the amber LED "POWER ON" light when the control is armed. To disarm the control press the "POWER ON" hidden switch again. Terms used for the control are shown in (Figure 2).

To activate the control, press the "LIFTGATE ACTIVATED" hidden switch twice within one second (located under the Tommy Gate logo). You should see the red "LIFTGATE ACTIVATED" light when the control is activated. To lower the platform, push the control toggle switch down. To raise the platform, push the control toggle switch up. When you remove pressure from the control toggle switch, the operation will stop.

After you have activated the control by pressing the "LIFTGATE ACTIVATED" hidden switch twice within one second (located under the Tommy Gate logo), you have approximately 5 minutes to use the gate. If the gate is not used for approximately 5 minutes, the "LIFTGATE ACTIVATED" timer deactivates the control. If the gate is used during the 5 minutes, the "LIFTGATE ACTIVATED" timer automatically resets for an additional 5 minutes. To reactivate the timer, press the "LIFTGATE ACTIVATED" hidden button twice within one second.

Note: If your gate includes a pendant control, the operation of the pendant will be the same but the "LIFTGATE ACTIVATED" timer will be 90 seconds.

Step 5. Unlock and remove the latch padlock. Put the padlock in the storage location (Figure 3).

Step 6. Move the latch handle away from the truck to disengage the latch hook. With the other hand, push up on the control toggle switch to raise the platform ear out of the latch plate (Figure 4).

Step 7. When the platform has traveled high enough to prevent the latch hook from re-engaging, approx. 2 inches, move the latch handle toward the truck with one hand. This will make the latch ramp cover the latch slot (Figure 5).

Step 8. With the other hand, push down on the control toggle switch to lower the platform until it clears the latch slot, approx. 4 inches, (Figure 6). At this point you can let go of the latch handle.
Step 9. To lower the platform, stand off to the side, well clear of the platform and push down on the control toggle switch. Allow the platform self-close arm to unfold the platform to the horizontal position as it lowers. Check to make sure the self-close arm has returned to the disengaged position (Figure 7).

Step 10. To load and use the railgate, center the load on the platform side to side and front to back (Figure 8). Put heavier loads as close to the front of the platform as possible (near truck). Platform cart stops may be actuated at this time, if equipped. Tie down rings are provided to help secure the load.

Note: Railgate capacity depends on both the weight and location of the load. Loads placed closer to the taper may reduce lifting capacity or damage the liftgate.

Step 11. To raise (or lower) the load, push up (or down) on the control toggle switch until the load has reached the desired position. Be sure the self-close arm is disengaged. Do not allow the pump and motor to continue to run after the platform has reached its maximum height or after it has reached an obstruction (Figure 9).

Step 12. To close the platform, stand to the passenger's side of the platform, not under, behind or on the platform. With the platform lowered, close and lock the platform cart stops, if so equipped, then lift the handle of the self-close arm with your hand to engage the self-close arm (Figure 10).

Step 13. Continue holding the self-close arm in the engaged position while raising the platform. After the platform begins to fold, release the handle of the self-close arm and step away from the lift. Continue raising the platform until the platform latch ear is above the latch slot (Figure 11).

Step 14. If required, hold the platform vertical against the latch hook with one hand and lower the platform into the latch plates until the latch hook completely closes over the platform latch ear (Figure 12).

Step 15. Always install the latch padlock and deactivate the control when not in use (Figure 12).

The Tommy Railgate needs to be serviced every 120 days or 4000 cycles, which ever comes first.

**The lift will not be automatically serviced when the vehicle is serviced.**

If there is any noticeable problem with the liftgate between service intervals, the liftgate must be taken out of service and checked immediately.

As is with any mechanical product, a preventive maintenance program needs to be followed in order to keep it in its best operating condition. Please review this information and if you should have any questions please call (712) 847-8000. Please have your model number and serial number available.

All installations, re-installations, and repairs of Tommy Gate Railgates should be performed by a qualified authorized distributor that is familiar with its operation and safety features. All replacement parts must be of original quality, and all safety and operational decals must be attached. No modifications are allowed to a Tommy Gate product unless authorized by the Engineering Department at Tommy Gate.

**MAINTENANCE PROCEDURE**

(A) Remove the box cover.

(B) Check for fluid leaks from the cylinder, hoses, and all fittings (replace or repair if found to be leaking).

(C) Check the oil level in the reservoir. With the liftgate platform at the bottom of its travel, the fluid should be two-thirds full. Add Tommy Gate winter grade, ISO grade 32 hydraulic, or Dexron III/ Mercon ATF if needed.

(D) Check the inside of the box for excessive accumulation of dirt. Clean as necessary.

(E) Check the lift chains, the platform drop chains, the platform, the uprights, the vertical sliders, and the pulleys for damage or excessive wear. Replace any worn or damaged part.

**NOTE:** If no issues are found during the 120 day inspections, we recommend that the lift chains be replaced after 4 years or 10,000 cycles whichever comes first. Chains should be replaced with original "Tommy Gate" chain only.

(F) Clean the inside surfaces of the uprights with a nonflammable solvent. Lubricate the lift chains and pivot points with clean, high quality, nondetergent, petroleum-based oil- **DO NOT USE GREASE.** Use nondetergent 10W @ (14°F-32°F), 20W @ (32°F-104°F), and 30W @ (104°F-122°F).

(G) Check the welds on the railgate, its mounting brackets and on the adjacent vehicle structure for cracks or damage. Repair any cracks or damage.

(H) Check the torque on all mounting bolts and re-tighten as necessary.

STANDARD WARRANTY

Railgate Series

2500 & 3000

The Tommy Gate Company provides a limited warranty against faulty materials or workmanship.

2-Year Warranty

Tommy Gate pump and motor unit parts are guaranteed for two (2) full years from date of user purchase against faulty materials or workmanship.

2-Year Warranty

Tommy Gates are guaranteed for (2) years from the date of user purchase against faulty materials or workmanship.

All affected parts must be returned to the factory prepaid - with full credit issued for those found to be defective. Warranty replacement parts will be shipped from the factory prepaid.

Labor charges to install warranty replacement parts shall be paid in accordance with Tommy Gate's estimated repair time guide and a flat hourly rate established by Tommy Gate.

DEVIATION FROM THE WARRANTY TIMES LISTED MUST BE AUTHORIZED BY TOMMY GATE COMPANY IN ADVANCE.

The warranty does not include damage resulting from improper installation procedures. Parts must be installed according to Tommy Gate Company's specifications.

Tommy Gate Company will not pay labor for removing other equipment to gain access to Tommy Gate Equipment. Tommy Gate Company will not pay labor for time on the road to and from a service call.

Tommy Gate Company reserves the right to disallow or reduce claims for parts which have been damaged due to misuse, abuse, accidents, improper shipping; or parts which have been incorrectly or unnecessarily replaced.

The warranty is void if the product has been subject to other than normal use. THERE ARE NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE WARRANTY OF MERCHANTABILITY OR A WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE EXTENDING BEYOND THAT SET FORTH ABOVE.
WARRANTY CLAIMS HANDLING PROCEDURE

The following procedures are required when an authorized distributor submits a warranty claim for a defective Tommy Gate part:

1. Before any expense is incurred, but after the problem has been diagnosed, the authorized distributor should contact Tommy Gate Company's Warranty Department to discuss the problem and its correction.

2. If it is determined that the condition is potentially covered by Tommy Gate Company's warranty, the authorized distributor will receive instructions on how to proceed. A decision will be made to either repair or replace the product or part in question.

3. If the product or parts are to be repaired, the authorized distributor will receive a **WARRANTY REQUEST NUMBER**.

4. If the product or parts are to be replaced, the authorized distributor will be instructed to either hold the parts for inspection by a representative, in which case the authorized distributor will receive a **WARRANTY REQUEST NUMBER**, or the authorized distributor will be asked to return the product for inspection to Tommy Gate Company, in which case the authorized distributor will receive a **RETURN GOODS AUTHORIZATION NUMBER**. Under no circumstances are parts to be returned without a **RETURN GOODS AUTHORIZATION NUMBER**.

5. After the repair or replacement work is completed, the authorized distributor will submit the claim to Tommy Gate Company with the following information.
   a. Tommy Gate Company **WARRANTY REQUEST** and/or **RETURN GOODS AUTHORIZATION NUMBER**.
   b. Tommy Gate model number.
   c. Tommy Gate serial number.
   d. Tommy Gate part number involved and a description of the apparent problem or defect.
   e. Authorized distributor performing warranty work.
   f. Person responsible for warranty work (contact).
   g. Distributor from whom liftgate was purchased.
   h. Liftgate owner's name, address, and phone number.
   i. Action taken, cost involved, complete with work orders and parts expense invoices.

6. If defective parts are to be returned to Tommy Gate Company they:
   a. Must be packaged for each individual warranty return. No multiple warranty claims in the same box.
   b. Must be returned "freight prepaid" to Tommy Gate Company's location.
   c. Must be clearly marked with the **RETURN GOODS AUTHORIZATION NUMBER** on the outside of the package.

Warranty claims must be submitted by the Authorized Distributor on behalf of their customer as part of their customer assistance.

Warranty claim acceptance or rejection is based solely upon defective part inspection and a review of the claim date (outlined in step 5 above) as they apply to the requirements of Tommy Gate Warranty. Claim reimbursement after acceptance is governed by those allowances previously agreed upon between Tommy Gate Company and the Authorized Distributor (as outlined in Steps 1-4 above).

Any warranty claims submitted without a **WARRANTY REQUEST NUMBER** or **RETURN GOODS AUTHORIZATION NUMBER** and the necessary information will be denied.
