PATENT PENDING

REAR CAMERA & SENSOR INTEGRATION.

Tommy Gate Rear Camera and Sensor Bars fit seamlessly below the liftgate mainframe and reposition the factory camera and sensors in a manner that is aesthetically appealing while still retaining component functionality.

In order to meet the challenge presented by the emerging technology and the effects on liftgate compatibility, Tommy Gate has been working eagerly to provide a clean and simple solution to the issue.

The resulting Rear Camera Bar kits are application specific and only available for the newest pickup models. Tommy Gate will continue to release additional applications as future pickup models are released.

Rear Camera and Sensor Bars integrate seamlessly into the liftgate mainframe while maintaining factory component function.
