WARNING: Cancer and Reproductive Harm—www.P65Warnings.ca.gov
Before removing box cover do the following:
1) Lower platform to ground or close and latch.
2) Disconnect positive battery cable(s).

Decal No. 12
Located on rear out side of power unit case.

Do not raise the liftgate with the rear doors partially open.
Doing so may damage the door or liftgate platform.
Always fully open or close the rear doors before operating the liftgate.

Decal No. 13
Located on the exterior bottom right corner of the driver side rear door.

NOTE: When ordering Decals, please have Decal Numbers available.

To replace decal, clear area of grease and dirt with non-flammable solvent and soap and water. Allow to dry. To apply decal, peel off 1/2 of back. Hold decal squarely and apply to cleaned surface. Peel off remaining back and smooth in place. Gently rub decal with a damp rag or sponge to smooth out bubbles. (The decal has a pressure-sensitive adhesive on the back.)

If the liftgate is going to be painted, you need to mask the decals before painting. Remove the mask after painting so the decals can be read clearly.
Your Tommy Gate operates off your vehicle battery. The vehicle battery powers a motor coupled to a hydraulic pump. Placing the toggle switch into the raise position will direct the pump flow to retract the cylinder attached to the lift arm and the platform will raise. A check valve blocks return flow from the cylinders to the pump and a pressure relief valve prevents the gate from being overloaded.

**Warning:** Liftgate is not to be used as a scale. Liftgate may lift more than its rated capacity. Be aware of how much is being lifted and never exceed the rated capacity of the liftgate. Be aware of how much is being hauled and never exceed the rated capacity of the vehicle.

Placing the toggle switch into the lower position will direct the pump flow to extend the cylinder attached to the lift arm and the platform will lower. Once the lower arm contacts the ground the cylinder will continue to extend and will tilt the platform's taper end down.

Tommy Gate's control includes a low voltage warning feature. When the control is armed with 7 volts or less present at the power unit, the amber "POWER ON" LED will blink. This warns the operator of the low voltage condition, but will not disable the liftgate. The gate may still raise or lower, depending on how low the voltage is. Correct this condition as soon as possible.

**Caution:** Continuing to operate the liftgate in the low voltage condition may result in failure of electrical components in the power unit.

The low voltage condition may be caused by a weak battery, loose or corroded connections, improper ground, or bad electrical cables. This condition may be corrected by just starting the vehicle or replacing the battery.

**Figure 1:** Parts identification.
**Caution:**

Never leave the truck with the platform on the ground, partially raised, or open.
Never show children or unauthorized personnel how to operate the gate.

To prevent children or unauthorized personnel from operating the lift, be sure the gate is in the stored position and the padlock is installed. Make sure the control is deactivated before leaving the truck unattended.

**Warning:** The Tommy Gate is an industrial product for material handling only and is not to be used as a personnel or wheelchair lift. Do not ride on the platform and always stand clear of the platform when opening, raising, or lowering.

Step 1. Unlock padlock and remove pin from support arm. Open the rear van door and locate the FOLD/UNFOLD toggle switch (mounted on the van pillar) and the pendant control.

Step 2. Be sure to stand clear of the platform and all moving parts when using the lift.

Step 3. To turn the control power on, press the "POWER ON" hidden switch once, marked with black rings or circles (located between the Tommy Gate logo and the toggle switch). You should see the amber LED "POWER ON" light when the control is armed. To disarm the control, press the "POWER ON" hidden switch again.

Step 4. To activate the control, press the "LIFTGATE ACTIVATED" hidden switch twice within one second (located under the Tommy Gate logo). You should see the red "LIFTGATE ACTIVATED" light when the control is activated.

**Note:** After you have activated the control, you have approximately 90 seconds to use the gate. If the gate is not used for approximately 90 seconds, the "LIFTGATE ACTIVATED" timer deactivates the control. If the gate is used during the 90 seconds, the "LIFTGATE ACTIVATED" timer automatically resets for an additional 90 seconds. To reactivate the timer, press the "LIFTGATE ACTIVATED" hidden button twice within one second.
OPERATOR'S INSTRUCTIONS

Step 5. To unfold the platform, stand to the side clear of the platform and all moving parts, then push the pendant toggle switch down while pushing either up or down on the FOLD/UNFOLD toggle switch. When you remove pressure from the pendant toggle switch, the operation will stop.

Note: When fully raised, the platform should be unfolded partially before lowering.

Step 6. Pull the platform handle strap to open the platform to full width, and step away from the platform as it opens.

Step 7. To lower the platform, stand to the side clear of the platform and all moving parts, then push the pendant toggle switch down until the platform taper touches the ground. When you remove pressure from the toggle switch, the operation will stop.

Step 8. Finish opening the rear of the van by opening the van's remaining rear door.

Step 9. Unfold the threshold bridges. These bridges provide a transition from the liftgate platform to the van floor.

Step 10. To load the liftgate, center the load on the platform side to side and front to back. Put heavier loads as close to the front of the platform as possible (near truck).

Note: The liftgate capacity depends on both the weight and location of the load. Capacity of the Cantilever Series is based on a load at capacity located 28" back from the platform front (near truck).

Step 11. To raise load, stand off to the side, well clear of the platform and push up on the pendant toggle switch until the load has reached the desired position. Do not allow the pump and motor to continue to run after the platform has reached it's maximum height or after it has reached an obstruction.

Step 12. After completing the loading of the truck, fold the threshold bridges.

Step 13. Lower the platform a few inches to clear the rear van doors, then close the driver side van door.

Step 14. Close and latch the cart stops, if they are raised.

Step 15. With the load removed, raise the platform to the top of its travel and fold the platform in half using the handle strap.

Step 16. To fold the platform up behind the van, push up on the pendant toggle switch while holding either up or down on the FOLD/UNFOLD toggle switch until the platform is tight against the platform stop.

Step 17. Deactivate the pendant control and hang it in the van.

Step 18. Close the rear van door and install the latch pin and padlock.

LEVELING PLATFORM FOR LOADING

1. **Park** the van on a level surface.
2. **Unlock** the platform.
3. **Unfold** the platform completely.
4. **Adjust** the passenger side support arm so that the platform is 1-1/2" from level over a 3 foot length (Figures 3 and 4).
   a. **Remove** the 1/2" x 3-3/4" bolt and nut.
   b. **Rotate** the length adjuster in to lower taper or out to raise taper.
   c. **Reinstall** the 1/2" x 3-3/4" bolt and nut.
5. **Adjust** the driver side support arm so that both support arms carry the platform load equally. Adjustment similar to passenger side.
6. **Verify** that all bolts have been re-installed and tightened.
7. **Close** and **Lock** the platform.

**Figure 3:** Platform leveling position.

**Figure 4:** Support arm adjustment.
ADJUSTING PLATFORM TO FOLD CORRECTLY

1. Park the van on a level surface.
2. Verify that the platform folds to a vertical position without hitting the van door.
3. Loosen the 3/8" nuts on the driver side support arm (Figure 5) so they do not contact the stop when the platform is folded.
4. Support the platform to keep it from falling or hitting the van in the next step.
5. Adjust the fold cylinder for closed/vertical position, if needed (Figure 5).
   a. Loosen the length adjuster jam nut.
   b. Remove the 1/2" x 3-3/4" bolt and nut.
   c. Rotate the length adjuster in to close less or out to close more.
   d. Reinstall the 1/2" x 3-3/4" bolt and nut.
6. Repeat step 5 until platform is vertical and can not hit the van door.
7. Fold the platform to the vertical position.
8. Tighten the lower 3/8" nut on the driver side support arm until it contacts the stop bracket.
9. Unfold the platform partially.
10. Tighten the lower 3/8" nut on the driver side support arm one additional turn.
11. Tighten second 3/8" nut on the driver side support arm against the lower 3/8" nut.
12. Loosen the adjustment nuts on the passenger side support arm (Figure 5).
13. Fold the platform to the vertical position.
14. Align the latch slots/holes on the passenger side support arm.
15. Insert the latch pin into the aligned slots/holes on the passenger side support arm.
16. Tighten the adjustment nuts on the passenger side support arm.
17. Verify that all bolts have been re-installed and tightened, and the jam nut is tight.
18. Close and Lock the platform.

Figure 5: Platform closing adjustment.
USING THE EMERGENCY CHAIN-UP FEATURE

The emergency chain-up feature is used to temporarily hold the lift up if the lift will not raise or will not stay raised. Have the lift repaired before using it in this condition.

1. **Fold** the threshold bridges.
2. **Close** and **latch** the cart stops, if they are raised.
3. **Close** the driver side van door.
4. **Raise** the lift to the top of its travel.
   - If the lift will not raise on its own, it can be raised with a jack.

![Caution:](Caution) Do not position yourself under the lift or platform while performing the next step. The lift may drop suddenly when unchained, if not supported. Notify distributor doing the service work that the lift has been chained.

5. **Attach** the emergency chain (Figure 7) to the bolt located in the chain-up channel (Figure 6) of the tension arm. If a jack was used in step 4, it can now be removed.
6. **Fold** the platform in half using the handle strap.
7. **Remove** the 1/2" x 3-3/4" bolt and nut from the fold cylinder length adjuster (Figure 5).
   - Skip this step if the lift will fold on its own.
8. **Fold** the platform to the vertical position.
   - Be sure to enlist enough personnel to lift the platform, as it will be heavy.
9. **Install** the platform locking pin and padlock.
10. **Deactivate** the pendant control and hang it in the van.
11. **Close** the rear van door.

![Figure 6](Figure 6: Chain-up channel location.)

![Figure 7](Figure 7: Emergency chain location.)

REMOVING THE EMERGENCY CHAIN-UP FEATURE

1. **Support** the platform to keep it from falling in the next step.

![Caution:](Caution) Do not position yourself under the lift or platform while performing the next steps.

2. **Remove** the padlock and locking pin (Figure 5).
3. **Unfold** the platform manually or hydraulically.
   - Be sure to enlist enough personnel to manually lower the platform, as it will be heavy.
4. **Apply** pressure with a jack under the tension arm to keep it from dropping in the next step.
5. **Remove** the emergency chain from the chain up channel (Figure 6 and 7).
6. **Repair** the liftgate as needed.

All installations, re-installations, and repairs of Tommy Gates should be performed by a qualified authorized distributor that is familiar with its operation and safety features. All replacement parts must be of original quality, and all safety and operational decals must be attached. No modifications are allowed to a Tommy Gate product unless authorized in writing by the Engineering Department at Tommy Gate.

As is with any mechanical product, a preventive maintenance program needs to be followed in order to keep it in its best operating condition. Please review this information and if you should have any questions, please call (712) 847-8000. Please have your model number and serial number available.

The Tommy Gate needs to be serviced every 120 days or 1500-2000 cycles, whichever comes first.

(A) Check the oil level in the reservoir. With the liftgate platform unfolded and at the bottom of its travel, the fluid reservoir should be one-half full. Add ISO grade 32 hydraulic oil, Dexron or equivalent, if needed.

(B) Check for leaks from the cylinders, hoses, and all fittings (replace or repair if found to be leaking).

(C) Replace any worn or missing parts before the liftgate is put back into service.

(D) If needed, adjust platform latch which is designed to hold the liftgate in a properly stored position.

(E) Check for cracks in all welds (repair if needed).

(F) Check for wear at all pivot points.

(G) Check all electrical connections. (clean or repair if needed)

(H) Replace fuses, if needed. Check electric cables for worn or damaged insulation.

(I) Replace or clean safety decals, so that they are legible.

(J) Check for proper operation of the control.

A. **STANDARD WARRANTY**

The Tommy Gate Company provides a limited warranty against faulty materials or workmanship. Cantilever Series Tommy Gates are warrantied for two (2) full years from the date of user purchase against faulty materials or workmanship.

All affected parts must be returned to the factory prepaid - with full credit issued for those found to be defective. Warranty replacement parts will be shipped from the factory prepaid.

Labor charges to install warranty replacement parts shall be paid in accordance with Tommy Gate's estimated repair time guide and a flat hourly rate established by Tommy Gate. **DEVIATION FROM THE WARRANTY TIMES LISTED MUST BE AUTHORIZED BY TOMMY GATE COMPANY IN ADVANCE.**

The warranty does not include damage resulting from improper installation procedures. Parts must be installed according to Tommy Gate Company's specifications.

Tommy Gate Company will not pay labor for removing other equipment to gain access to Tommy Gate Equipment. Tommy Gate Company will not pay labor for time on the road to and from a service call.

Tommy Gate Company reserves the right to disallow or reduce claims for parts which have been damaged due to misuse, abuse, accidents or improper shipping; or parts which have been incorrectly or unnecessarily replaced.

The warranty is void if the product has been subject to other than normal use. **THERE ARE NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE WARRANTY OF MERCHANTABILITY OR A WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE EXTENDING BEYOND THAT SET FORTH ABOVE.**

B. **WARRANTY CLAIMS HANDLING PROCEDURE:**

The following procedures are required when an authorized distributor submits a warranty claim for a defective Tommy Gate part:

1. Before any expense is incurred, but after the problem has been diagnosed, the authorized distributor should contact Tommy Gate Company's Warranty Department to discuss the problem and its correction.

2. If it is determined that the condition is potentially covered by Tommy Gate Company's warranty, the authorized distributor will receive instructions on how to proceed. A decision will be made to either repair or replace the product or part in question.

3. If the product or parts are to be repaired, the authorized distributor will receive a **WARRANTY REQUEST NUMBER.**
4. If the product or parts are to be replaced, the authorized distributor will be instructed to either hold the parts for inspection by a representative, in which case the authorized distributor will receive a WARRANTY REQUEST NUMBER, or the authorized distributor will be asked to return the product for inspection to Tommy Gate Company, in which case the authorized distributor will receive a RETURN GOODS AUTHORIZATION NUMBER. Under no circumstances are parts to be returned without a RETURN GOODS AUTHORIZATION NUMBER.

5. After the repair or replacement work is completed, the authorized distributor will submit the claim to Tommy Gate Company with the following information:
   a. Tommy Gate Company WARRANTY REQUEST and/or RETURN GOODS AUTHORIZATION NUMBER.
   b. Tommy Gate model number.
   c. Tommy Gate serial number.
   d. Tommy Gate part number involved and a description of the apparent problem or defect.
   e. Authorized distributor performing warranty work.
   f. Person responsible for warranty work (contact).
   g. Distributor from whom liftgate was purchased.
   h. Liftgate owner's name, address, and phone number.
   i. Action taken, cost involved, complete with work orders and parts expense invoices.

6. If defective parts are to be returned to Tommy Gate Company, the parts:
   a. Must be packaged for each individual warranty return. No multiple warranty claims in the same box.
   b. Must be returned "freight prepaid" to Tommy Gate Company's location.
   c. Must be clearly marked with the RETURN GOODS AUTHORIZATION NUMBER on the outside of the package.

Warranty claims must be submitted by the Authorized Distributor on behalf of their customer as part of their customer assistance.

Warranty claim acceptance or rejection is based solely upon defective part inspection and a review of the claim date (outlined in step 5 above) as they apply to the requirements of the Tommy Gate Warranty. Claim reimbursement after acceptance is governed by those allowances previously agreed upon between Tommy Gate Company and the Authorized Distributor (as outlined in steps 1-4 above).

Any warranty claims submitted without a WARRANTY REQUEST NUMBER or RETURN GOODS AUTHORIZATION NUMBER and the necessary information will be denied.
