

## SIDE SENSOR RELOCATION APPLICATION CHART

*\*component functionality must be verified by installer*

For select newer pickup models, Tommy Gate now offers optional Side Sensor Relocation Kits compatible with G2 Series liftgates. The optional kits install on the side of the liftgate, repositioning the vehicle side-facing sensors\*. These kits require a rear camera and sensor bar, sold separately.

MAKE	YEAR / MODEL	FACTORY SIDE-FACING SENSOR COMPATIBLE WITH TOMMY GATE	SIDE SENSOR RELOCATION KIT NUMBER

*N/A = Not Applicable*

### IMPORTANT

- Side Sensor Relocation Kits and Rear Camera and Sensor Bars are only available for some newer model pickups.
- Relocating the factory installed side-facing sensors may affect sensor ranging and introduce blind spots. Operate with caution and do not depend on advanced features that may take over steering or braking.
- This kit is used in addition to rear camera and sensor bar kits on vehicles with particular packages or features. This kit is used to relocate specific factory installed sensors on G2 Series liftgates and does not support aftermarket products.

### NOTES

1. Only for 2022 Nissan Frontier with the Technology Package.
2. Only for 2018-2019 Nissan Titan with, SL Trim, SV Convenience Package, PRO-4X Trim, or Platinum Reserve Trim.
