

SIDE SENSOR RELOCATION APPLICATION CHART

For select newer pickup models, Tommy Gate now offers optional Side Sensor Relocation Kits compatible with G2 Series liftgates. The optional kits install on the side of the liftgate, repositioning the vehicle side-facing sensors*. These kits require a rear camera and sensor bar, sold separately.

**Component functionality must be verified by installer*

| MAKE | YEAR | MODEL | FEATURE KEYWORDS ¹ | VISUAL CLUE | PAINTED KIT NUMBER | GALVANIZED KIT NUMBER | INSTRUCTION SET |
|---------------|-----------|--------------------------------------|--|---|--------------------|-----------------------|-----------------|

| | 2017-2024 | TITAN | | | | | |

N/A = Not Applicable

IMPORTANT • Vehicles with the listed feature(s) require the listed side sensor relocation kit. Otherwise, only the Rear Camera and Sensor Bar Kit is needed.

- NOTES**
- Feature names change over time. Look for these keywords to decide whether side sensors are present if only the window sticker or order information is available.
 - Excludes** “older” body styles that were sold under a similar model name in the same years:
 - 2019 Chevrolet Silverado 1500 LD
 - 2019 GMC Sierra 1500 Limited
 - 2019-2024 Ram 1500 Classic
 - Not compatible if the truck has six (6) parking sensors in the rear bumper **and** has indicator lights in side mirrors.
