

REAR CAMERA & SENSOR BAR APPLICATION CHART

U.S. Patent #9,963,085

For select newer pickup models, Tommy Gate now offers an optional Rear Camera and Sensor Bar compatible with both Original Series and G2 Series liftgates. The optional bar installs along the bottom of the liftgate mainframe and repositions the vehicle backup camera and parking sensors.*

* component functionality must be verified by installer

NOTE

IMPORTANT

- Side Sensor Relocation Kit may be needed for some packages or equipment groups. Please reference **Side Sensor Relocation Kit Chart** on www.tommygate.com.
- For dual rear wheel (DRW) trucks, this kit works for rear camera only. Additional kit required for rear sensors. See **Side Sensor Relocation Kit application Chart** on www.tommygate.com.
 - Relocating the factory installed rear camera may affect the accuracy of the camera guidelines, hitch view and alternate camera views. Operate with caution and be sure to check surroundings before reversing the vehicle.
 - Relocating the factory installed rear sensors may affect sensor ranging and introduce blind spots. Operate with caution and do not rely on advanced features that may take over steering or braking.
 - Camera and sensor bar kits are compatible with pickup body G2 or Original Series liftgates. The kits include hardware to re-use the vehicle's rear camera and/or sensors.
